DETAILED ACTION

1. Claims 1-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Costanzo '312 in view of Klint.

In figures 18-22 of Costanzo, mat-top chain links with first rollers in the cavities are taught.

Klint teaches using a rotating roller 15, that extends in the direction of travel of the conveyor belt, to rotate article supporting rollers 11. Therefore, it would have been obvious to use the roller 15 of Klint in place of friction strip 185 of Costanzo.

With regard to claims 7, 17 and 32, since roller rotating surfaces 185 may be vertically adjustable as discussed in column 7, lines 2-8 of Costanzo, it would have been obvious that roller 15 of Klint could likewise be vertically adjustable. With regard to claims 8 and 18, the design of the vertical displacement means is immaterial to the operation of the system. With regard to claims 28 and 30, there is no good reason to use a machined roller that is non-driven when the first rollers are parallel to the second rollers. As for the situation where the first rollers are inclined to the axis of the non-driven second rollers, using a machined roller is a waste of money, etc. over the friction strip 185 of Costanzo.

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the vertical displacement means of claims 8 and 18 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. Applicant should consider limiting the claims by adding that each second roller is directly below a single first roller of at least one link of the chain in order to distinguish over the laterally offset roller 15 that engages two rollers 11 on the same link 5 of Klint.
4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
